Support close by

Training at your clinic and support by phone.

What clinics say

> Animo is the third system we have tried at our practice, and I think it is the last. Well structured, intuitive, minimalist and practical. It has everything a practice and a veterinary clinic need, and it works for vets and clients who speak Romanian, English and Russian. Customer support is a ten out of ten, and updates are practically instant. I think it has the potential to be implemented in every clinic in Moldova, and maybe Romania too.
